

EA500

Air purifier

extreme air products

Fast and powerful

The EA500 is an effective ceiling air purifier with an incredible amount of power. This fast and powerful air purifier works by means of mixing ventilation and the efficient Ultra-Pleat filter technology.

The Ultra-Pleat technique removes even the smallest particles from polluted air very efficiently.

This filter technique has a large storage capacity that lasts much longer than the usual techniques used in ceiling air purifiers. The air to be cleaned passes no less than 3 filters. A pre-filter removes the larger particles such as hair and coarse dust from clothing and carpets. The Ultra-Pleat HEPA filter removes small particles such as smoke, micro-organisms and fine dust. The tests prove it: Ultra-Pleat even removes particles as small as 0.01 microns! The third filter is an active carbon filter which eliminates unpleasant odors.

With the EA500 air purifier, 95% of all pollutants are removed from the air! The maintenance of this system only takes you a minute and can easily be done yourself.

No bulky metal filters, but a compact and easily exchangeable 3-in-1 filter cassette.

The EA500 air purifier is ideal for the hospitality industry. The capacity is very large and maintenance is very simple. We supply this device for smoking areas, restaurants, cafes and nightclubs.

EA500

TECHNICAL SPECIFICATIONS

Mains voltage	230V/50hz	Mounting	Ceiling or wall
Max. power consumption	200W	Weight	18 kg
Max. air capacity	1500 m3 / hour	Dimensions (hxwxd)	660 x 385 x 190 mm
Max. space (advice)	275 m2	Casing	steel
Fan speeds	4	Colors	white
Noise level	35.5 / 44.2 / 50.5 / 61.2 dBa	Warranty	2 years
Operation	remote control, infrared	Norm	CE
