

NEUTRALISER COMPACT

Removes troublesome
odours in the most
compact spaces

extreme air products

Solving odour problems in the smallest spaces

The importance of addressing odour problems, even in the smallest of spaces, is great. Unpleasant odours are perceived as unpleasant and can negatively affect our mood. An unpleasant odour triggers negative associations and affects our entire system.

The Neutraliser Compact is a perfect solution for neutralising unpleasant odours in very small spaces, such as lifts, cars, changing rooms or entrance halls. The Neutraliser Compact can easily be fixed in any location using the adhesive strips on the back. But it can also be hung on a hook. The Neutraliser Compact works with neutralising odour cubes and uses passive diffusion by air movement, without a fan.

Metazene®

The dry refills used in the Neutraliser Compact can be changed easily and without mess. Depending on the room and the chosen scent, it is necessary to use 1 or 2 cubes. These fragrance cubes contain the neutralising substance Metazene® and, in addition, they also contain a pleasant fragrance to refresh the room. The neutraliser Metazene® breaks down unpleasant odours at the molecular level, removing them from the air. Metazene® is a registered trademark.

These fragrance refills use environmentally friendly and healthy substances that do not contain formaldehyde. This makes the Neutraliser Compact suitable for use in any room imaginable, as there are no health risks and it can be attached to any pitch. In addition, thanks to the choice of different fragrances, it is possible to freshen up the room as desired.

Various scents

Various scents are available, e.g. white tea, lavender, vanilla and green tea lemongrass. It has never been easier to eliminate unpleasant odours at the molecular level while enjoying a pleasant and healthy fragrance.

TECHNICAL SPECIFICATIONS

Space advice	1 - 6 m ²	Colour	White
Installation	With adhesive strips or on hook	Weight	142 g
Casing	Plastic	Dimensions	97 x 152 x 32 mm (wxhxd)
