

NEUTRALISER

Effective solution for odor nuisance

extreme air products

Odor neutralization, what a relief!

The Neutraliser offers a very effective and powerful solution against odor nuisance. Whether it concerns incontinence odor nuisance in nursing homes, sweat smells in fitness centers or changing rooms. This little powerhouse gets rid of all undesirable smells.

How does it work?

The odor neutralization cartridges that are used in the Neutraliser are very concentrated and extremely powerful. A cartridge contains a number of different ingredients. On the one hand, a combination of essential oils to mask undesirable smells and refresh the room. On the other hand a number of neutralizing substances that break down odor particles at the molecular level. The only thing you will notice in the workplace is that the undesirable smells disappear like snow in the sun..

Simple installation and maintenance

The Neutraliser is equipped with a microfan that is easily adjustable on the adapter. The appliance has a recess on the side with which it can be easily mounted on the wall. The cartridges have a shelf life of two months and can easily be exchanged. Maintenance only takes a minute per change.

Incontinence in healthcare

In nursing homes and hospitals it often doesn't smell very fresh. The smell of incontinence material, for example, is very unpleasant in some departments of nursing homes. The cartridge

neutral has been specifically developed to neutralize and mask these odors. Many healthcare institutions in the Netherlands and Belgium have already been helped with this solution and are very satisfied with the result. A simple, effective and very cost efficient solution to a persistent problem..

Dressing rooms and wardrobes

Changing rooms of hospitals, sports centers and production companies do not always smell that pleasant. Lots of people together in one room are usually a recipe for stale, polluted air quality. In the Jeroen Bosch Hospital in Den Bosch, one Neutraliser has cleaned a changing room for 200 nurses of all body odors and provided it with a fresh scent. Music venue De Melkweg is also a good example. When 1,500 concert visitors come in with wet coats, the scent in the wardrobe is unbearable. Just one device provides pleasant air quality in the entire entrance of this theater.

NEUTRALISER

TECHNICAL SPECIFICATIONS

Mains voltage	230V / 50Hz	Color	white
Space advice	50 - 150 m ²	Weight	890 g
Operation	7 positions	Dimensions (lxwxh)	290 x 100 x 100 mm
Noise level	25-35 dBA	Warranty	1 year
Casing	aluminum	Norm	CE
