

# SMARTSCENT

Enjoy the comfort and  
convenience of the  
Smartscent aroma diffuser

extreme air products

# Powerful aroma diffuser

In the past, aroma marketing was only available for large companies and institutions. With the Smartscent, the experience of aromatherapy is now also possible for work, practice and group areas

The Smartscent uses a new technique, based on atomization, to easily create an aroma experience in rooms of 60-80 m<sup>2</sup>. Due to the simple technology and the various available scents, the Smartscent is ideal for use in practice areas, such as at a physiotherapist or coach.

With aromatherapy, you can also create a pleasant feeling and atmosphere in a classroom, a reception or shop. Not to forget the possibilities in massage and session rooms. With the Smartscent you can experience the comfort of aromatherapy in every room.

## Aroma's

The carefully selected aromas can be spread simply and effectively thanks to this new invention. Thanks to a balanced selection of fragrances, the desired aromatherapy is possible for every room and application. For the mystical, spiritual experience there are scents such as **Palo Santo** and **Sage**. **Lavender** is a classic for those looking for peace and relaxation and **citrus vanilla** is also a soft, warm scent that is very pleasant in, for example, a store.

Of course there is also an invigorating citrus scent available, **lemongrass sage**, and with **clean cotton** you create the warm and refreshing feeling of freshly laundered cotton.

## Unique Technique

The Smartscent has a unique mechanism with which the scent, based on essential oil, is introduced into the room as a cold mist. The fragrance flacons are ready-to-use and can be placed in the Smartscent right away. With the slider you can easily ensure a 30, 60 or 90 day effect, with which you can determine the intensity of the scent. The Smartscent has a consistent fragrance distribution throughout the selected cycle, so without decreasing intensity at the end.

## TECHNICAL SPECIFICATIONS
