

XBD230

Construction dryer

Removes moisture in large areas

Too high a level of humidity is bad for your home and your belongings. It can lead to mould, rust, wood rot and condensation. Which eventually results in damage to floors, furniture, art and antiques. The ideal humidity is between 40 and 60%. With the XBD230, you can maintain the level of humidity even in large rooms.

The XBD230 is a professional condensation dryer that is perfect for large open spaces such as a warehouse, production area or construction site. In a condensation dryer, a fan draws the air over a cold evaporator block. Due to the strong cooling of the air, much of the water vapour contained in it is precipitated. The cooled air then passes a warm condenser block and is blown back into the room as dry air. Condenser dryers are more effective at higher temperatures and are preferably used from 15°C.

i-EcoDefrost

The XBD230 building dehumidifier uses smart i-EcoDefrost technology. This technology defrosts the cooling element faster and allows the dehumidifier to operate more economically and efficiently.

The XBD230 is easy to move thanks to its robust wheels and extendable handle. The units can also be stacked on top of each other when not in use. Useful if the dryers are used for projects or rented out and need to be stored in between.

The XBD230 is a robust dehumidifier that can take a rough ride and is designed for intensive and long-term use. It is easy to use and maintain. Just wash the permanent filter and empty the water tank (11.4 litres). For even more convenience, you can also choose to connect a permanent water drain.

For optimal operation, it is important to take sufficient capacity and ventilation will also need to be closed as much as possible to prevent excessive moisture from outside.

TECHNICAL SPECIFICATIONS

Mains voltage	230V/50hz	Dimensions (hwxwd)	595 x 464 x 508 mm
Max. capacity	41 l/dyg	Weight	28 kg
Max. space	230 m ²	Housing	steel
Max. power	690 W	Colour	black
Noise	37-58 dB	Permanent drain	optional
Operation	manual	Protection class	IPX1
Fan speeds	2	Refrigerant	R290
Aut. Hygrostat	yes	Warranty	Private 2 years, Business 1 year
