

# XKD230

Professional dehumidifier

# Powerfull dehumidifier for climate control

To prevent moisture damage, it is important to keep humidity below 60%. Too high a level of humidity can lead to mould, rust, wood rot and condensation. Which ultimately results in damage to floors, furniture, art and antiques. With the XKD230, you can professionally maintain humidity in basements and crawlspaces.

The XKD230 is perfect for dehumidifying crawl spaces and for climate control in large basements or storage areas. The dry air released during the dehumidification process can be released directly into the room. Thereby, the XKD230 also has the possibility to move this dry air to other parts of the house via a duct. This allows ideal humidity to be regulated throughout the house.

Optimising humidity has several benefits. Moisture problems such as mould, wood rot and condensation are prevented. And during hot summer days, dry air feels more comfortable, reducing the need to turn on the air conditioner. Thereby offering an energy-efficient and price-efficient whole-house solution.

The XKD230 dehumidifier requires little maintenance and is designed for years of continuous use. The released water from condensation is drained via a garden hose and the XKD230 is equipped with an automatic pump so that the water can also be discharged upwards. The control panel is removable, so the XKD230 dehumidifier can be controlled from another room. Should the control panel cable be too short, it can easily be replaced (up to 10 metres).

For optimal operation, it is important that the dehumidifier has sufficient capacity so that it does not have to run continuously. Ventilation will also need to be closed as much as possible to prevent excessive moisture from outside.

# XKD230

## TECHNICAL SPECIFICATIONS

Mains voltage	230V/50hz	Dimensions (hwxwd)	450 x 622 x 360 mm
Max. capacity	42 l/day	Colour	Black/grey
Max. space	230 m <sup>2</sup>	Housing	steel
Max. power	500 W	Permanent drain	yes, including pump
Aut. Hygrostat	yes	Protection class	IPX1
Fan speeds	2	Refrigerant	R290
Operation	Digital panel, removable	Warranty	Private 2 years, Business 1 year
