

XLB200

Humidifier

P prevents problems caused by low humidity

A good level of humidity is important for yourself and your belongings. Especially during the heating season it can get very dry in your home. You may notice this yourself in your skin or dry eyes, but wooden floors and furniture also start to shrink. With the help of a humidifier, you can address these problems.

The XLB200 is an effective cold water humidifier with large capacity. This makes this humidifier suitable for e.g. a large living room, office, storage or retail space. The XLB200 has a built-in hygrostat, with which the humidifier automatically keeps the humidity at your desired level. In addition, the XLB200 features a large 25-liter reservoir, which ensures a long operating time. When the water reservoir is empty, the XLB200 automatically shuts down.

A cold water humidifier has the advantage of preventing moisture, scale and mineral deposits from forming around the humidifier. The dry, dusty air is blown through the wet humidifier filter by a fan, and then blown back into the room as humidified, clean air.

The XLB200 has a solid steel case and is mobile and ready to plug in, so it can be installed and put

into operation immediately. In terms of maintenance, it is advisable to replace the filter once a year. You should also keep in mind to re-fill the reservoir.

XLB200-WT

The XLB200-WT is exactly the same type of humidifier, but with a built-in permanent water supply connection, so you don't have to manually fill the reservoir in that case.

For optimal performance, it is important to get a humidifier with sufficient capacity. This depends on the size of the room and the amount of humidification needed. Make sure your humidifier does not need to run continuously to maintain the humidity level. For effectiveness it is also important that as little air as possible is extracted from the room.

XLB200

TECHNICAL SPECIFICATIONS

Mains voltage	230V/50hz	Dimensions (hwxwd)	670 x 600 x 310 mm
Max. capacity	26 l/day	Housing	Steel / plastic
Max. space	200 m ²	Colour	white
Power consumption	Max. 65 W	Reservoir	25 liter
Noise level	30-50 dB	Water connection	Optional (XLB200-WT has permanente water supply)
Operation	Panel, electronic	Warranty	2 years
Fan speeds	4		
Hygrostat	yes, electronic		
Weight	17 kg
