

XB150

Humidifier

extreme air products

Powerful humidifier for large rooms

Low humidity can cause a variety of problems. When the air is too dry, moisture is extracted from the environment, which can cause damage to floors, furniture, antiques, paintings and musical instruments. Too dry air can also cause complaints for yourself, such as stinging eyes, dry skin and headaches. The ideal humidity is between 40 and 60 r.h.

With the XB150 you can maintain the humidity in large spaces, think of an office, storage area or an apartment. The XB150 is a professional cold water humidifier with a very large capacity. Thanks to the built-in hygrostat, the XB150 will automatically keep the humidity at the level you desire. In addition, the XB150 has a large reservoir of 34 liters. When the water tank is empty the XB150 automatically shuts down.

One advantage of a cold water humidifier is that there is no moisture, lime and mineral deposits around the humidifier. The dry, dusty air is blown through the wet humidifier filter by a fan, then blown back into the room as humidified, clean air. Using a humidifier also eliminates static electricity, which is better for electronic equipment.

The XB150 is a solid humidifier that operates both easily and efficiently. The steel case is mobile and ready to plug in, so it can be installed and used immediately. In terms of maintenance, keep in mind to fill the reservoir, and it is recommended to replace the filter once a year. If you want even more convenience, it is possible to connect a fixed water supply, so you do not have to fill the reservoir yourself..

For optimal performance, it is important to get a humidifier with sufficient capacity. This depends on the size of the room and the amount of humidification needed. Make sure your humidifier does not need to run continuously to maintain the humidity level. For effectiveness it is also important that as little air as possible is extracted from the room.

XB150

TECHNICAL SPECIFICATIONS

Mains voltage	230V/50hz	Dimensions (hwxwd)	720 x 625 x 315 mm
Max. capacity	60 l/dag	Weight	18,6 kg
Max. space	350 m ²	Housing	steel
Power consumption	Max. 53 W	Colour	white
Noise level	29-42 dB	Water connection	optional
Operation	manual	Reservoir	34 liter
Fan speeds	2	Warranty	Private 2 years, Business 1 year
Hygrostat	yes
